- **Salesforce Administration:** data modeling, user management, security (profiles, permission sets, data security), Validation Rules, formulas and validations, reports and dashboards, Salesforce CRM, data import/export.
- **Flow Builder:** fundamentals, Screen Flows, Autolaunched & Scheduled Flows, record-triggered flows, logic, loops, Multirecord Elements & Transforms.
- **Apex & Development:** Apex fundamentals and database, triggers, Apex testing, Apex debugger, rapid application development.
- **Lightning Web Components (LWC):** fundamentals, Lightning web components and data, Lightning Design System, Lightning App Builder.
- **Salesforce Platform:** Platform API, object customization, Agentforce 360 Platform, developer experience.
- **Service Cloud & CRM:** support cases, service console, case routing, leads, opportunities, accounts and contacts.
- **Security:** data protection, credential security, user authentication, identity fundamentals, session-based permission sets.
- **CRM Analytics:** Customer Lifecycle Analytics.

WORK EXPERIENCE

Salesforce Core Intern | Capgemini España S.L.

Oct 2025 – Apr 2026 · Valencia

- Modeled custom objects, fields, validation rules and permission sets for new service flows within the DCX (Digital Customer Experience) unit.
- Declarative automations with Flow Builder: Record-Triggered, Screen Flows and Scheduled Flows replacing manual processes.
- Configured Lightning Pages and designed email templates for end-user-facing service flows.
- European data loading (postal codes for four markets) with Data Loader and Data Import Wizard, handling duplicates and post-load validation.
- Wrote user stories and designed pre-development test suites, collaborating with QA and architecture.
- Continuous internal training through Capgemini seminars: Generative AI in Software Engineering, Refactoring, Testing + Continuous Integration, Lowcode, Design Thinking and Innovation.

Transport / Catering | Integrastu

2022 – 2024 / 2026 · Valencia

- Occasional transport and event catering assignments.

PERSONAL PROJECTS

TallerApp — Bachelor's Thesis (Final Degree Project) | Angular + NestJS + PostgreSQL 2026 · Valencia

- Full management system for a car repair shop with appointments, work orders, PDF invoicing and JWT authentication. Stack: Angular 21, NestJS 11, PostgreSQL 16, TypeORM, jsPDF, Jest. **Thesis defended in 2026, grade 9/10 (Distinction).**

Gym Tracker | gym.masanco-hub.com — in production 2026 · Valencia

- Offline-first PWA to log workouts, with custom SVG charts and a FastAPI backend. Automatic PR detection, SSO with masanco-hub. ~3,600 LOC. Real personal use.

Web JASB | jasbct.com — in production 2025–2026 · Valencia

- Corporate website for JASB Energía & Telco with a custom multilingual i18n system ES/EN, accessible and free of heavy dependencies. Stack: HTML5, Bootstrap 5.3, vanilla JS.

Trading Bot · Multi-agent AI | experimental 2026 · Valencia

- Three autonomous LLM agents (analyst, manager, executor) trading on Polymarket with the Kelly Criterion. Real-time market data via Binance WebSocket. Stack: Python 3.12, FastAPI, Angular 21, Ollama.

EDUCATION

Bachelor's Degree in Computer Engineering Graduated 2026

University of Valencia, ETSE – Burjassot, Valencia

- Thesis (TFG): TallerApp — full management system for a car repair shop (Angular + NestJS + PostgreSQL). **Grade: 9/10 (Distinction).**
